Series Big squared stories

Large-format illustrated books in which great authors and great illustrators tell simple and universal stories to talk about important topics. At the end of each book, some interactive pages invite the reader to get involved.

INTELLIGENCES

THE BOOK

We are at the height of the digital age, and yet still the true intelligence can't and must not be independent of interiority, of interpretation and the ability to look at things with different perspectives. It's that talent that allows people, animals and nature to deal with and successfully solve new or unknown situations and problems. Hence the sixth title for the Festival of Creative Culture, dedicated to young people, so that they can cultivate the thousand faces of their own intelligence and the seed of their own creativity in facing the world.

THE AUTHORS

ANTONIO FERRARA, texts.

Great Italian author and illustrator, also known for his commitment to spread the passion for literature in children.

He has received several awards: the Andersen Award in 2012 for the best book over 15 years, in 2015 for best illustrator, and in 2018 the 61st Bancarellino Award.

ARIANNA PAPINI, illustrations.

Esteemed author and illustrator of books for children and teenagers, she is also an art therapist. Among the several awards, in 2018 she received the Andersen Award for best illustrator.
